### Typical Characteristics

Please refer to our current safety data sheet for detailed information about the typical product characteristics. We recommend using the product within 12 months.

### How to use

Skyvell Multi Use for an immediate and specific odor removal of textile fabric, carpet fiber and other floor coverings.

#### Carpet fiber and floor coverings:

In case of strong odours the product may be spread directly on surfaces as carpets or other floor coverings.

#### The product can be added to the cleaning water:

- Final use: use 100ml with 6l of water (extraction cleaning)  
Use 100ml with 3l of water (Bonnet-Pad cleaning)

More or less can be used depending on the intensity of the odour. In professional use in big spaces you can also spread it with a fogging machine.

#### Textile surfaces:

In case of strong odours the product may be spread directly on surfaces as cushion, beddings, curtains, sheets, towels and so on.

#### Textiles (washing-machine):

For the odor removal of textiles, e. g. sportswear, hand towel, bed linen and similar, the product can also undiluted be enclosed with the washing machine.

#### Pets:

Dilute and use for cleaning pet cages, litter boxes and stables etc. Or use full strength on pet accidents. More or less can be used depending on the intensity of the odor.
